PROFILE

I'm Chathura Madhusankha, an undergraduate in BSc (Special) Management Information Systems at NSBM Green University. I specialize in frontend web development, UI/UX design, and digital marketing, with a growing focus on quality assurance and software testing. My approach combines creative problem-solving with analytical thinking, enabling me to design and develop user-centric digital experiences that are both functional and visually compelling. I aim to grow as a designer and developer by taking on new challenges, learning from others, and creating user-friendly, impactful digital solutions. Staying updated with the latest trends helps me ensure my work is innovative and meaningful.

PROJECTS

- Redesign of BOC B-App(group project)

Redesigned the BOC B-App in Figma to enhance UI/UX, focusing on usability, accessibility, and visual appeal. Collaborated with stakeholders to align the design with user needs.

- Web Application - LACED(Academic project)

Developed a shoe-selling web app using HTML, CSS, JavaScript, and MySQL. Features a responsive, intuitive interface for seamless shopping and data management.

- Web Application – Bow-wow (Animal Donation Site)

Created an animal donation site using HTML, CSS, JavaScript, and PHP. Designed for easy navigation, connecting donors with animals via a user-friendly, responsive interface.

- Mobile Application – Carftsy (Handmade item selling & buying platform) Ongoing

Carftsy is a Mobile Application develop by using Flutter and dart. This mobile application allow users to sell their own hand made product and also buying the product

TECHNICAL SKILL

- Front-End Development: HTML5, CSS3, JavaScript, Responsive Design, UI/UX Principles
